## A Warning Issued To Prospectors

**A matter of vital importance to prospectors, especially uranium hunters, has been brought to the attention of the editor of this newspaper. It concerns rock mounds that can be found throughout the state, that were erected to identify section and quarter section corners.**

**There is a definite law against moving or destroying these very important rock mounds which were erected way back in 1883-84 by engineers who surveyed the state of Utah. In a lot of places people, probably uranium prospectors, have torn down the mounds to make some of their own designating their uranium claim. . . No doubt those guilty are also unaware of the real value of these common Pioneer corner markers. . . Thus a word of warning might help us all. The modern corner marker of sections is now a pipe driven into the ground with a brass cap.**

## Emergency March Of Dimes Gets Underway

The Emergency March of Dimes throughout Duchesne County got underway last Thursday night with an attempt to contact every home in the county, reported co-chairmen, Mr. and Mrs. Anthon B. Christensen.

An attempt is being made at the present time to contact numerous homes which were not contacted last Thursday. However, it will be appreciated if those wishing to contribute would send their contributions to the chairmen if they haven't been contacted.

The generous contributions made thus far are very much appreciated, as the polio emergency need is very great at this time. Several new cases in the county are being helped by the Chapter, as well as several old ones. The chairmen again report that no case has ever been refused aid in the county, and will not be refused as long as funds are available.
